

### NOTICE OF JOB OPENING – 2/17/2017

**Job Title:** Studio Maintenance Technician – UNION (403g)  
**Location:** KCBS2/KCAL9-TV Studio City  
**Department:** 401/Engineering

#### **Job Description:**

**KCBS2/KCAL9 TV**, the CBS Owned & Operated Duopoly in Los Angeles, is seeking a forward-looking, experienced ENG maintenance engineer to become part of the Stations' Engineering and Operations team. This is a staff IBEW union engineering position reporting directly to Engineering and Operations Management.

Job duties include:

- Troubleshooting electronic equipment to a component (hardware/software) level
- Working with equipment makers and vendors to correct problems, including ordering parts/services
- Reviewing discrepancy reports and addressing issues with minimal supervision

This position may require overtime as job schedules warrant, and, in emergency situations, call-in on nights or weekends.

#### **Required Skills/Experience:**

Candidates must have:

- A sound engineering foundation and the ability to troubleshoot and repair complex television broadcast systems
- Knowledge of modern Electronic News Gathering (ENG) systems and field operations
- Strong project supervision and coordination skills
- Ability to effectively communicate and work with other members of the engineering staff, station employees and management, and outside vendors.

#### **Preferred Skills/Experience:**

- Understanding of and experience with the following types of ENG field equipment and supporting systems:
- Sony XDCam and EX series cameras and supporting recording devices
- Grass Valley video servers and editors
- Motorola commercial 2-way radio systems, MRC (Vislink) microwave radio systems
- Lectrosonics wireless microphone & IFB systems
- Non-linear edit systems (such as AVID, Apple FCP 7 and Grass Valley "Edius")
- Evertz up/down/cross conversion, Harris routing/encoding, Telestream transcoding systems
- Analog and digital test equipment to validate/troubleshoot audio and video signals
- Knowledge of and understanding of FCC rules and regulations as they govern the broadcast industry
- Knowledge of 2-way communications service monitor, spectrum analyzer and network analyzer
- Broad IT knowledge

#### **Minimum Education Level:**

Four-year engineering degree or two year engineering technology ASET related to electronics or radio/television.

#### **Additional Candidate Instructions:**

Referral Instructions:

All qualified candidates MUST apply to the CBS Television Stations online Applicant Tracking System:

[www.cbsandyou.com](http://www.cbsandyou.com) (internal applicants) and [www.cbscareers.com](http://www.cbscareers.com) (external applicants).

This is the ONLY method by which applications will be accepted for open positions.

**NO PHONE CALLS OR EMAILS PLEASE.** Only qualified candidates considered for this position will be contacted for an interview. We regret that we cannot accept phone calls or respond to individual inquiries.
